Case Palletizer

PHC80S

**Ultra-High Speed Operation
at 4,800 Cases/Hour !**

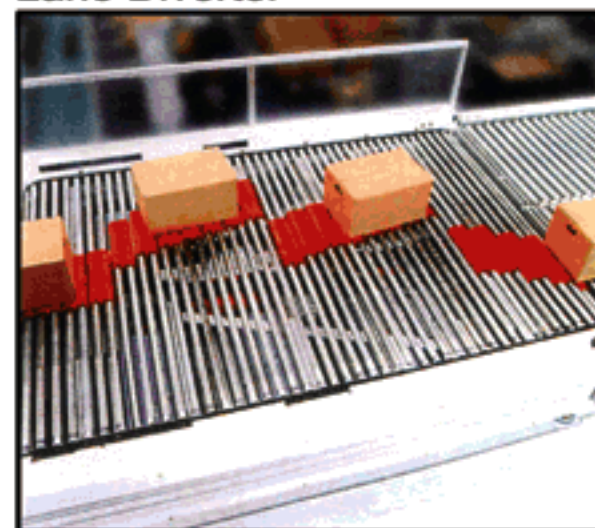

Turn Conveyor

2 lines of conveyor rollers with differentiating speeds rotate the cases to the correct angle for palletizing. This system provides the flexibility for the cases to be turned with minimal impact by 90° in both directions or by 180°.

Lane Diverter

Diversion can take place into a maximum of 5 lanes.

Layer Conveyor No. 1

The cases are formed gently into the optimal layer structure.

Layer Conveyor No. 2

Gaps within the layer are closed with the gentle pushing of the guides.

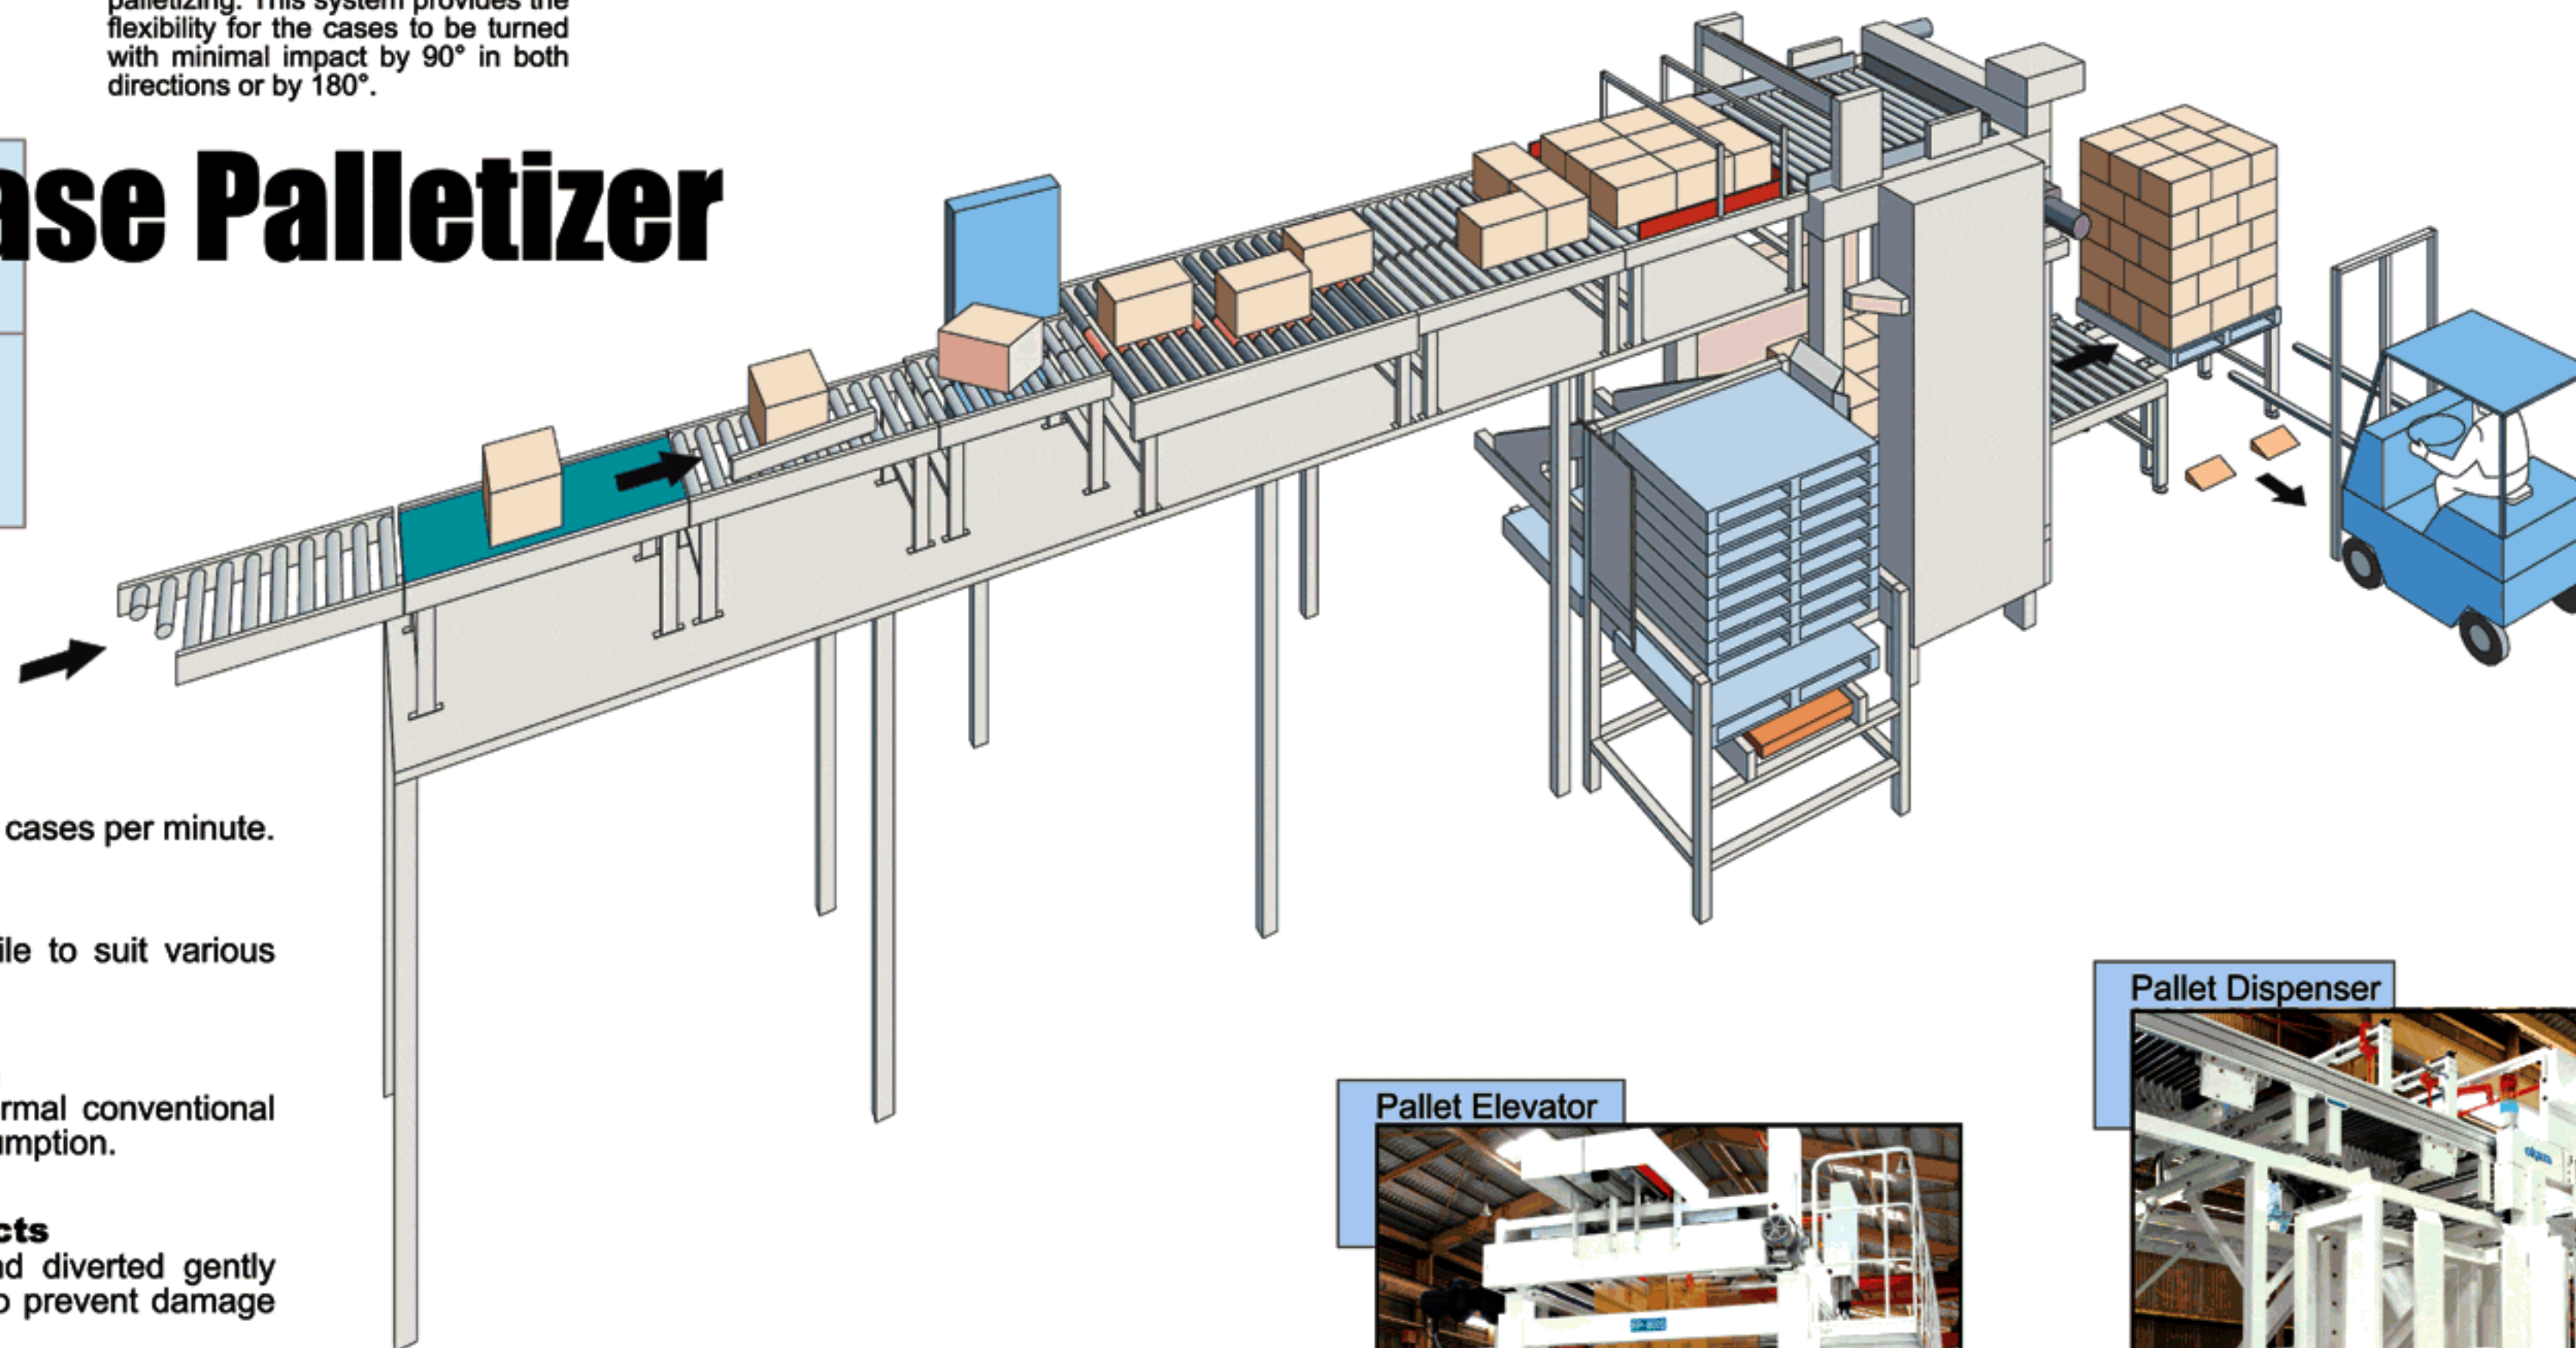

Stacking Section

Pin Hole patterns can be easily configured with the provided software.

Okura Case Palletizer

PHC80S

High Capacity

Maximum capacity of 80 cases per minute.

Versatile Patterns

Pallet forming is versatile to suit various product and pallet sizes.

Low Energy Consumption

Only utilizes 50% of normal conventional palletizers' energy consumption.

Minimal Impact on Products

Products are turned and diverted gently using roller conveyors to prevent damage to fragile products.

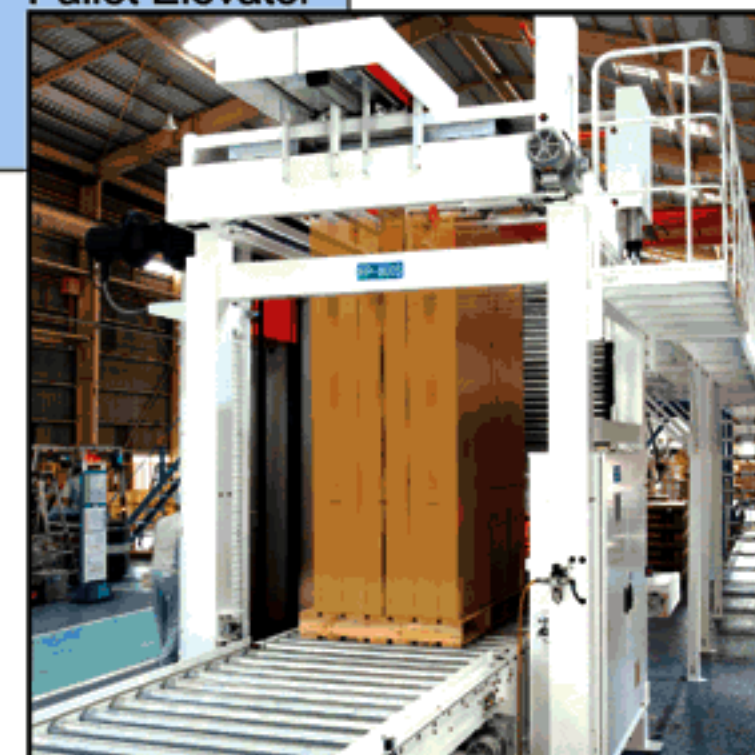

Simple Operation

The operation panel screen provides clear indications on its colour LCD interface.

Easy Maintenance

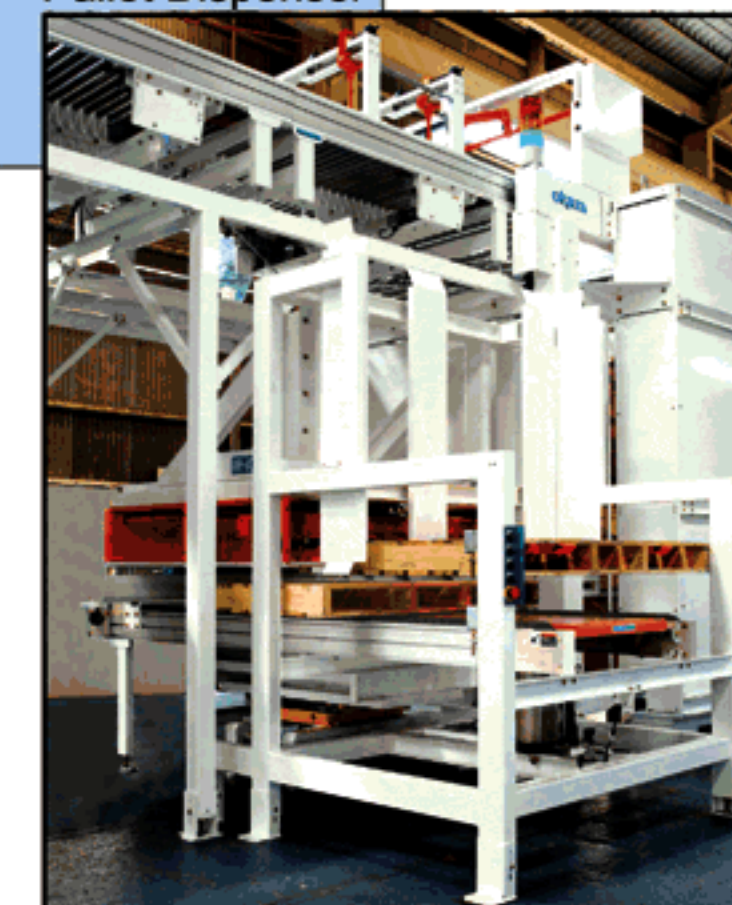

The system is made up of separate components, which are easily detachable for ease of maintenance.

Pallet Elevator

The servo motor-powered elevator performs smooth elevating and lowering of loaded pallets.

Pallet Dispenser

The pallet dispenser operates using a lifter and forks to allow the handling of various sizes of pallets reliably without adjustment.

Why **Okura**?

In business since 1927

More than 3,000 installations world-wide

Total maintenance and after-sales service

We provide SOLUTIONS, not just products.
